

Press Release

Energiency and Dena Energy forge strategic partnership to roll-out AI-driven analytics for industrial energy efficiency in the United States

San Jose, California – February 21st, 2025 – In a move to redefine energy efficiency, **Energiency**, a leader in AI-powered energy-analytics solutions, has teamed up with **Dena Energy**, an energy efficiency consultancy based in California. This collaboration is set to integrate Energiency's state-of-the-art AI-driven energy-analytics tools into Dena Energy's consulting services, empowering businesses to slash energy consumption, optimize costs, and elevate sustainability initiatives.

By combining **Dena Energy's** expertise in industrial energy efficiency audits with **Energiency's** AI capabilities, this partnership offers a comprehensive, end-to-end energy management solution. Energiency's AI-powered energy-analytics tools are particularly focused on manufacturing facilities, serving a wide range of clients - from single-factory operations to multinational corporations like **SKF**, **L'Oréal**, and **Stellantis**. Through this collaboration, clients will gain actionable insights to reduce their energy footprint and unlock substantial savings.

Farzan Kazemifar, CEO of Dena Energy, states, "This strategic partnership with Energiency is a game-changer. By integrating Energiency's AI-driven analytics, we can provide our clients with a transformative energy management solution—enhancing our energy efficiency audits and driving significant improvements in their energy footprint."

Arnaud Legrand, CEO of Energiency, adds, "We are excited to partner with Dena Energy, a pure player in energy audits. Their consulting expertise, combined with Energiency technology, creates an unmatched opportunity to drive energy optimization and sustainability for businesses everywhere."

About Energiency

Energiency is an Industry 4.0 SaaS technology, leveraging AI and data analytics to empower manufacturing companies to detect and achieve up to 25% new energy & CO2 savings within months. Energiency is already adopted by global manufacturing leaders in food, chemistry, automotive, paper or raw materials such as SKF, Naval Group or DS Smith in more than 30 countries in the world. www.energiency.com

About Dena Energy

Dena Energy is a California-based energy efficiency and sustainability consulting firm specializing in commercial and industrial energy audits. The company has helped a diverse range of clients enhance energy performance, optimize efficiency metrics, and ensure compliance with regulatory requirements. <https://dena.energy/>
